Acknowledgements

The cards were inspired by the EoP game by **Adam Shostack**.
The threats were inspired by the OWASP LLM, Agent and MCP Top 10 and the publications by the **OWASP Foundation**.
The Boudary Transfer, Geometric Attack and Adversarial Subspace cards were inspired by the work of **Disesdi Shoshana Cox**.
The inspiration for the privacy cards came from the work of **Mark Vinkovits** for his EoP Privacy Extension, **Marko Hämäläinen**, **Laura Noukka**, **Hiski Ruhanen**, **Ilona Varis**, and **Antti Vähä-Sipilä** for their Elevation of Privacy and **Kim Wuyts** for LINDDUN Go.

• 01 • ACKNOWLEDGEMENTS

i Deck composition

30 CARDS ACROSS 5 SUITS:

- ♠ Spades, Adversarial Threats (6 cards: A, K, Q, J, 10, 9)
- ♥ Hearts, Autonomy Threats (6 cards: A, K, Q, J, 10, 9)
- ♦ Diamonds, Data Threats (6 cards: A, K, Q, J, 10, 9)
- ♣ Clubs, Privacy Threats (5 cards: A, K, Q, J, 10)
- ★ Trumps, Structural Hazards (7 cards: I, II, III, IV, V, VI, VII)

High ranks (A, K) indicate broader or more foundational threats. Low ranks (10 within a suit; lower Roman numerals in Trumps) indicate more specific or variant threats. Trumps beat any non-trump card regardless of rank.

Support Material

The following:
A worked threat model
A detailed rule book
A runbook - facilitator's checklist for running the sessions
A Companion Guide
A Threat Register - Post Session Template

Are all available in the repository
<https://github.com/BrettCrawley/elevation-of-autonomy>

• 02 • DECK COMPOSITION • SUPPORT MATERIAL

i Game rules (short form)

THE RULES FOLLOW EOP CLOSELY. IF YOU HAVE PLAYED EOP, YOU CAN PLAY THIS IMMEDIATELY.

Setup

- Pick a dealer. The dealer hands out all 30 cards as evenly as possible.
- With **3 players**: each gets 10 cards.
- With **4 players**: two players get 8 cards and two get 7. The extra cards go to whoever is leading the session (typically the facilitator) so they can guide the opening trick.
- With **5 players**: each gets 6 cards.
- With **6 players**: each gets 5 cards.

- The system being threat modelled is on a whiteboard or screen visible to all players. Ideally a data flow diagram with trust boundaries.
- Have the post-session template (or any threat register) open and a nominated reporter.

• 03 • GAME RULES / SETUP

i Play

- The player to the left of the dealer leads by playing any card and describing how the threat on that card applies to the system being reviewed. The description must be specific: a generic "an attacker could..." does not count. If the player cannot describe a concrete application, they play a different card.
- Play proceeds clockwise. Each subsequent player must either:
 - Play a card of the same suit with a more concrete or more severe application of that suit's category, OR
 - Play a trump card with a structural hazard that applies to the same component, OR
 - Pass and discard a card face-up (only if they genuinely have no applicable card in hand).
- Highest card wins the trick (trumps beat all non-trump cards). The winner of the trick leads the next one.
- Each accepted threat is recorded in the threat register with the card ID, component affected, the example given. A proposed mitigation is agreed before the next trick is led.
- Play continues until all cards are played or the facilitator calls the session. Whoever has surfaced the most unique, accepted threats is the winner of the game, but the real winner is the design that ships safer.

• 04 • GAME RULES / PLAY

i House rules worth considering

- The Spotlight rule.**
On any turn, any player may call "Spotlight" and nominate a specific component of the DFD. All players must then play a card that applies to that component or pass. Useful for forcing attention on a neglected area.
- The Architect's Veto.**
The architect in the room may veto a threat if they can demonstrate that a specific existing control eliminates it. The demonstration must be specific; "we have a WAF" does not count.
- The Privacy Round.**
If personal data is in scope, dedicate one full round to Clubs only. Forces the team to walk-through the T.R.I.M. categories explicitly.

• 05 • HOUSE RULES WORTH CONSIDERING

i Scoring (optional)

MANY TEAMS DON'T BOTHER WITH SCORING: THE THREATS IN THE REGISTER ARE THE POINT. BUT IF YOU WANT IT:

- Threat surfaced**
(card played and accepted): 1 point.
- Threat recorded with a concrete mitigation:**
bonus 1 point.
- Threat that wins the trick**
(highest card in the suit or a winning trump): bonus 1 point.

Score at the end. The player with the highest total wins. Ties are broken by whoever surfaced the most Trumps-suit threats, on the grounds that structural hazards are the hardest to spot and deserve the recognition.

• 06 • SCORING
